PROFILE

Junior Full-Stack Web Developer with a Bachelor's degree (Licence) in Internet/Intranet Application Development, currently enrolled in the first year of a Master's programme in Computer Modelling and Engineering (M1, Bac+4 level). Java is my preferred area of development: I have built web applications using Java EE/Jakarta EE, Spring Boot, React, PostgreSQL and MySQL. I work with both Windows and Linux, and use Git regularly. Methodical, independent and detail-oriented, I focus on requirements analysis, complex problem-solving and code quality. My goal is to contribute to the development and maintenance of Java applications, particularly those involving data collection, processing and quality, while collaborating effectively within a technical team.

PROFESSIONAL EXPERIENCE & ACADEMIC PROJECTS

Full-Stack Developer — Mada-BMP (ongoing M1 project) 08/2026 – Present

Academic project / work-study

- Design and development of a professional business management platform using Spring Boot, React, PostgreSQL and REST APIs.
- Implementation and testing of client management, services, simulated payments, invoicing and QR-code features, with access control and data separation by workspace.

Java EE Web Developer — VolaTech *Academic project — 3 months* 02/2026 – 05/2026

- Development of an e-commerce application using Java EE/Jakarta EE, Servlets, JSP, JDBC and PostgreSQL.
- Catalog, order, simulated transaction, PDF invoicing and QR-code pickup management.

Full-Stack Developer — Zina by Tsara Volo (E-commerce startup) 16/06/2025 – 16/09/2025

Final-year undergraduate internship (Licence)

- Full-stack development with Spring Boot and React: dashboards for tracking orders and turnover, PostgreSQL analytical queries and real-time WebSocket updates.

- Project coordination: daily check-ins, tracking deliverables and reporting to the internship supervisor.

Java / Spring Boot Developer — Lalana (Nosy Be Travel Agency) 04/2025 – 06/2025

Academic project — 2 months

- Design of a tourism management application using Spring Boot, Thymeleaf, Spring Security and PostgreSQL.
- Development of tour, destination, flight and booking modules, with separate Client, Manager and Administrator areas.

TECHNICAL SKILLS

JAVA & BACKEND DEVELOPMENT

- **Java / Spring Boot:** REST API design, object-oriented programming, Spring Security, authentication and business logic.
- **Java EE / Jakarta EE:** Web application development with Servlets, JSP, JDBC and HTTP session management.

- **Databases:** PostgreSQL, MySQL, relational modelling, SQL queries and data manipulation.

ENVIRONMENTS & TOOLS

- **Operating systems:** Windows 11 IoT Enterprise LTSC and Ubuntu Linux (dual boot).
- **Tools:** Git/GitHub, Docker, Postman and Java development environments.
- **Methods:** Technical analysis, problem-solving, teamwork and Agile practices.

ADDITIONAL SKILLS

- **Data:** Extraction, filtering, structuring and processing with SQL.
- **Programming:** Basic Python knowledge and an introduction to artificial intelligence.
- **Technical English:** Reading and understanding technical documentation.

WEB DEVELOPMENT & INTEGRATION

Frontend: React, Vite, JavaScript, TypeScript, HTML/CSS, Tailwind CSS and Bootstrap.
Web technologies: Client-server architecture, HTTP/HTTPS, JSON, REST APIs and external service integration.

Communication & notifications: SMTP (SSL/TLS), transactional emails, Orange SMS API integration and API response handling.

TESTING, QUALITY & DEBUGGING

- **Backend and API testing:** Postman, REST endpoint checks, HTTP requests/responses, status codes, authentication and data validation.
- **Functional and E2E testing:** Checking complete application flows, API/SMS integration and demonstration scenarios.

- **Software quality:** Error analysis, debugging, processing validation and verification of exchanges between services.

EDUCATION

Master's Programme — Computer Modelling and Engineering (M2I) 2025 – Present
École de Management et d'Innovation Technologique (EMIT), University of Fianarantsoa
Specialisation: Modelling, software architecture and advanced artificial intelligence.

Bachelor's Degree (Licence) — Internet/Intranet Application Development (DA2I) 2022 – 2025
École de Management et d'Innovation Technologique (EMIT), University of Fianarantsoa
Foundations: Relational databases (SQL), algorithms, web development and network programming (TCP/UDP).

LANGUAGES

Malagasy
Native

French
Intermediate (spoken and written)

English
Technical (reading documentation/code) – spoken English improving

INTERESTS

- Running
- Swimming
- Reading

SOFT SKILLS

Independence, attention to detail, teamwork, adaptability, curiosity, willingness to learn, organisational skills and problem-solving.
