PROFILE

Junior full-stack web developer with a Licence in Internet/Intranet Applications Development (DA2I), currently enrolled in Master 1 Modeling and Computer Engineering (M2I). Software development interests me so much that I devote most of my time to it: Java technologies, software architecture, artificial intelligence and data processing.
I work carefully and methodically, and can move forward independently when needed. My goal is to contribute to reliable, maintainable solutions, keep developing my skills and find my place within a technical team.

EDUCATION

Master 1 – Modeling and Computer Engineering (M2I) 2025 – Present
École de Management et d'Innovation Technologique (EMIT), University of Fianarantsoa
Focus: Modelling, software architecture and advanced AI.

Licence – Internet/Intranet Applications Development (DA2I) 2022 – 2025
École de Management et d'Innovation Technologique (EMIT), University of Fianarantsoa
Foundations: Relational databases (SQL), algorithms, web development and network programming (TCP/UDP).

PROFESSIONAL EXPERIENCE & ACADEMIC PROJECTS

Full-Stack Developer – Mada-BMP (ongoing Master 1 project) 08/2026 – Present
Academic project / work-study
- Design and development of a business management platform with Spring Boot, React, PostgreSQL and REST APIs.
- Implementation and testing of client management, services, simulated payments, invoices and QR-code features, with access control and workspace data isolation.
- Python / FastAPI: internal analytics and decision-support service under development.

Java EE Web Developer – VolaTech (academic project, 3 months) 02/2026 – 05/2026
- Development of an e-commerce application with Java EE/Jakarta EE, Servlets, JSP, JDBC and PostgreSQL.
- Management of catalogue, orders, simulated transactions, PDF invoicing and QR-code pickup.

Full-Stack Developer – Zina by Tsara Volo (e-commerce startup) 16/06/2025 – 16/09/2025
Final-year undergraduate internship (Licence)
- Full-stack development with Spring Boot and React: dynamic dashboards for tracking orders and turnover, PostgreSQL analytical queries and real-time WebSocket updates.
- Project coordination: daily check-ins, tracking deliverables and reporting to the internship supervisor.

Java / Spring Boot Developer – Lalana (Nosy Be Travel Agency) 04/2025 – 06/2025
Academic project – 2 months
- Design of a tourism management application with Spring Boot, Thymeleaf, Spring Security and PostgreSQL.
- Development of tour, destination, flight and booking modules, with separate Client, Manager and Administrator areas.

TECHNICAL SKILLS

WEB DEVELOPMENT & INTEGRATION

Frontend: React, Vite, JavaScript, TypeScript, HTML/CSS, Tailwind CSS and Bootstrap.
Web technologies: Client-server architecture, HTTP/HTTPS, JSON, REST APIs and integration of external services.
Communication & notifications: SMTP (SSL/TLS), transactional emails, Orange SMS API integration and API response handling.

JAVA & BACKEND DEVELOPMENT

- **Java / Spring Boot:** REST API design, object-oriented programming, Spring Security, authentication and business logic.
- **Java EE / Jakarta EE:** Web application development with Servlets, JSP, JDBC and HTTP session management.
- **Databases:** PostgreSQL, MySQL, relational modelling, SQL queries and data manipulation.

ENVIRONMENTS & TOOLS

- **Operating systems:** Windows 11 IoT Enterprise LTSC and Ubuntu Linux (dual boot).
- **Tools:** Git/GitHub, Docker, Postman and Java development environments.
- **Methods:** Technical analysis, problem-solving, teamwork and Agile practices.

TESTING, QUALITY & DEBUGGING

- **Backend & API testing:** Postman, REST endpoint checks, HTTP requests/responses, status codes, authentication and data validation.
- **Functional & E2E testing:** Verification of complete application flows, API/SMS integration and demonstration scenarios.
- **Software quality:** Error analysis, debugging, processing validation and verification of communication between services.

ADDITIONAL SKILLS

- **Data:** Extraction, filtering, structuring and processing with SQL; fundamentals of Data Science, decision analysis and predictive analytics.
- **Programming:** Python, REST API development with FastAPI and an introduction to artificial intelligence.
- **Networking & communication:** TCP/UDP network programming, client-server communication and real-time WebSocket exchanges with Java and Python.
- **Technical English:** Reading and understanding technical documentation.

LANGUAGES

Malagasy
Native

French
Intermediate (spoken and written)

English
Technical (reading documentation/code) – spoken English improving

INTERESTS

- Running
- Swimming
- Reading

SOFT SKILLS

Independence, attention to detail, teamwork, adaptability, curiosity, willingness to learn, organisational skills and problem-solving.
